Docket No. RD-28,600  
U.S. Patent Application  
VOICE ACTIVATED DIAGNOSTIC IMAGING  
CONTROL USER INTERFACE  
Our Ref.: 12764-102**

Dear Maureen:

We have received a Notice to File Missing Parts in the above-identified patent application. This notice is routinely sent by the Patent and Trademark Office (USPTO) in response to the filing of an application without signed formal documents. To fulfill the requirements of the notice, we must now obtain and file signed formal documents.

Enclosed is a copy of the application as filed, together with the Declaration and Power of Attorney and Assignment. Please sign, in blue ink, the enclosed Declaration and Assignment forms. (Note that the Assignment requires notarization and that there are two copies of each form. Both copies should be originally executed by you). **After all of these documents have been signed and the assignments have been notarized, please return all documents to me via overnight mail.**

The declaration pertains to the invention as recited in the application claims. Therefore, please read the claims with particular care, and discuss them with me if you have any questions as to their scope or meaning. In addition, you should particularly note three things with respect to the declaration. In signing the declaration, all inventors will be verifying:

1. a number of statements with respect to originality of the invention;
2. that the inventor(s) listed on the declaration is/are the true inventor(s);

3. that you specifically acknowledge a duty to disclose to the Patent and Trademark Office information of which you are aware which is material to the examination of the application.

With respect to (2) above, each named inventor must have made a contribution to the subject matter of at least one claim. If any inventor has any questions whether the inventorship is correctly stated, for example, whether an individual who is a joint inventor is not included or that an individual is listed who is not one of the inventors, please discuss this matter with me. It is improper to sign a declaration which, in your judgment at the time of signing, states the inventorship incorrectly.

With respect to (3) above, in a number of patent infringement suits, patents have been held unenforceable because the inventor or his attorney did not bring to the attention of the Patent Office relevant facts of which they were aware. These relevant facts include information about prior art and prior activities which relate to the originality or use of the invention. Such facts include:

- a. prior published articles, patents, product announcements, technical reports, lectures or other published material of the inventor or others relating to the invention in whole or in part;
- b. any public use or demonstration of products or methods which might be considered as pertaining to your invention;
- c. any commercial product over which your invention is an improvement;
- d. any pertinent co-worker's prior or contemporaneous work of which you have knowledge; and
- e. any sale or offer for sale of products incorporating your invention or made by its use.

Any items of the type noted above and any other available information bearing on the claimed invention should be brought to my attention. We can then present the pertinent facts to the Patent and Trademark Office. Please note that your duty to disclose such information is a continuing one. Hence, if you later discover any relevant information, you should promptly bring it to my attention.

Please satisfy yourself that all examples described in the application are accurate and operate and that the best mode contemplated by you of carrying out your invention is clearly set forth.
